To: The Hiring Team & Talent Acquisition Partner

Application for AI / Data Science / Analyst Trainee Position (Internship & Full-Time)

Dear Hiring Team,

I am writing to express my enthusiastic interest in joining your organization. With a Bachelor of Engineering in Artificial Intelligence & Data Science from Sant Gadge Baba Amravati University (SGBAU) and active experience as an AI Engineer at Tanglobus, I have built a solid, hands-on technical foundation across Python, SQL, Power BI, Advanced Excel, Machine Learning, and Agentic Automation.

In my role at Tanglobus, I contribute directly to developing machine learning solutions and managing robust data preparation pipelines within an agile, fast-moving startup environment. In parallel, I have engineered high-impact projects that showcase both my analytical depth and engineering autonomy:

- **LinkedIn Job Copilot AI:** Designed a Chrome Manifest V3 browser agent that automates repetitive multi-step job applications using React DOM injection, reducing application overhead by 80% while upholding strict client-side data privacy.
- **AI-Powered Career Guidance System:** Built an end-to-end ML and NLP recommendation engine that predicts suitable career trajectories based on multidimensional candidate skill profiles.
- **Uber Data Analytics:** Conducted comprehensive data cleaning, visualization, and exploratory analysis on ride-sharing metrics to surface actionable business intelligence on peak demand cycles.

Whether collaborating remotely or on-site, I bring disciplined execution, rapid learning capacity, and strong analytical problem-solving to every task. I am open to both Full-Time and Internship roles, and I am excited about the opportunity to contribute meaningfully to your team's upcoming initiatives.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my technical skills and enthusiasm can support your team.

Sincerely,

Nikita Banwankar
