PROFESSIONAL SUMMARY

Entry-level AI & Data Science engineer currently working as an AI Engineer at a startup, with hands-on skills in Python, SQL, Power BI, Advanced Excel, and intelligent agent automation. Open to **Full-Time** and **Internship** opportunities (Work from Home / Remote / Pune).

EDUCATION

Bachelor of Engineering in Artificial Intelligence & Data Science **Aug 2023 – Jun 2026**
Sant Gadge Baba Amravati University (SGBAU), Amravati, India *CGPA: 7.65*

TECHNICAL SKILLS

AI & Machine Learning: Generative AI, Agentic AI, Prompt Engineering, Google Gemini API, Scikit-Learn, Pandas, NumPy, NLP

Data & Analytics: Power BI (DAX, Power Query, Data Modeling, Data Visualization), Advanced Excel (Pivot Tables, VLOOKUP, HLOOKUP), SQL (MySQL)

Software & Automation: Python, JavaScript, Chrome Extension APIs (Manifest V3), DOM Automation, Django, HTML5, CSS3, Git, GitHub

PROFESSIONAL EXPERIENCE

AI Engineer **Aug 2026 – Present**
Tanglobus (Startup) *Pune, India*

- Developing AI and machine learning solutions using Python, supporting product development in a fast-paced environment.
- Handling end-to-end data preparation, model training, and performance evaluation to deliver milestones on schedule.

KEY PROJECTS

LinkedIn Job Copilot AI (Browser Agent & Automation) **Oct 2026**
JavaScript, Chrome Manifest V3, DOM Automation, Python, Google Gemini AI

- Architected an AI browser agent parsing LinkedIn job postings to compute real-time resume match scores and skill gaps.
- Implemented React synthetic event automation to auto-fill multi-step Easy Apply applications with human review, cutting application time by 80%.
- Integrated LLM APIs for automated generation of tailored cover notes and responses to employer screening questions.

AI-Powered Multi-Domain Career Guidance System **Apr 2026**
Python, Machine Learning, NLP, Scikit-Learn, Pandas, NumPy, Tkinter

- Developed an AI-based system that recommends optimal career paths from user skills, education, and interests.
- Applied NLP text preprocessing and supervised classification to perform feature engineering and improve prediction accuracy.

Uber Data Analytics **Mar 2025**
Python, Pandas, Matplotlib, Seaborn, SQL, MySQL

- Performed end-to-end exploratory analysis of ride datasets: data cleaning and pattern visualization with Matplotlib & Seaborn.
- Identified ride demand trends and peak-hour traffic bottlenecks to support data-driven business decisions.

INTERNSHIP EXPERIENCE

Application Development Intern **Android (Java, XML)**

- Developed native Android application features using Java and XML, improving user interaction and responsiveness.

CERTIFICATIONS & SOFT SKILLS

Certifications: Internship Certificate - Application Development | Course Completion Certificate
Soft Skills: Effective Communication, Team Collaboration, Attention to Detail, Time Management, Fast Learner
