PROFESSIONAL SUMMARY

AI Engineer with hands-on startup experience designing and deploying **Agentic AI applications, Agent Harnesses, and LLM workflows** at Tanglobus. Proficient in **LangGraph, LangChain, Model Context Protocol (MCP) tool integration, Observability (LangSmith/Langfuse), and LLM Evaluation (Evals)** frameworks. Proven track record building tool-enabled agents with state checkpointing, error-handling middleware, and human-in-the-loop approvals.

TECHNICAL SKILLS

Agentic AI & Frameworks: LangGraph, LangChain, DeepAgents, Agent Harness Development, State Management, Checkpointing, Multi-Agent Orchestration, Human-in-the-Loop (HITL)

Protocols & Tools Integration: Model Context Protocol (MCP) Servers & Clients, Structured Tool Calling, Tool Discovery, API Tooling, Context Management

LLM Engineering & Observability: Prompt Engineering, Structured Outputs (Pydantic), Function Calling, RAG, Tracing (LangSmith, Langfuse, OpenTelemetry), LLM-as-a-Judge Evals

Programming & Backend: Python (Asyncio, OOP), FastAPI, SQL (MySQL, PostgreSQL), Scikit-Learn, Pandas, NumPy, Git, GitHub, REST APIs

PROFESSIONAL EXPERIENCE

AI Engineer (Agentic AI & LLMs) **Aug 2026 – Present**

Tanglobus (Startup) *Pune, India*

- Architected and developed core **Agentic AI workflows and Agent Execution Harnesses** for the enterprise **APS (Automated Processing System) Application** using Python, LangGraph, and LangChain.
- Engineered custom agent middleware for **tool execution loops, automated retries, error recovery**, dynamic context management, and **human-in-the-loop approval gates** for mission-critical business decisions.
- Implemented **Model Context Protocol (MCP) tool integrations** and REST API clients, allowing agents to reliably discover tools, execute structured queries across relational databases, and process unstructured documents.
- Integrated end-to-end **AI Observability (LangSmith / Langfuse)** to trace multi-step agent reasoning paths, monitor token consumption, track execution latency, and eliminate tool calling bottlenecks.
- Built automated **LLM Evaluation (Evals) suites** featuring ground-truth benchmark datasets and LLM-as-a-Judge to measure tool selection precision, task completion rates, and reduce hallucinations.

KEY PROJECTS

LinkedIn Job Copilot AI (Agentic Browser Harness & Automation) **Oct 2026**

Python, JavaScript, Chrome Manifest V3, DOM Tool Calling, LLM API, State Management

- Engineered an autonomous agentic browser assistant that parses DOM context, evaluates candidate skill match in real-time, and executes multi-step web navigation workflows.
- Implemented an agent execution loop with synthetic React DOM event dispatchers and built-in **human-in-the-loop safeguards** that pause execution before final submissions.
- Integrated Google Gemini LLM with structured function calling to dynamically generate tailored application cover notes and answer employer screening questions based on persistent candidate memory.

AI-Powered Multi-Domain Recommendation & Evaluation System **Apr 2026**

Python, Machine Learning, NLP, Scikit-Learn, Pandas, NumPy, Structured Evaluation

- Developed an AI-driven decision engine mapping user attributes to multi-domain career paths using supervised learning and text vectorization.
- Designed validation datasets and scoring metrics (precision, recall, F1) to benchmark classification performance and improve model generalization.

Uber Business Data Intelligence Pipeline **Mar 2025**

Python, Pandas, Matplotlib, Seaborn, SQL (MySQL), Exploratory Data Analysis

- Engineered an end-to-end data processing and analytics pipeline evaluating large-scale ride demand metrics, bottleneck trends, and dynamic pricing patterns to generate actionable business intelligence.

EDUCATION

Bachelor of Engineering in Artificial Intelligence & Data Science **Aug 2023 – Jun 2026**

Sant Gadge Baba Amravati University (SGBAU), Amravati, India *CGPA: 7.65*

CERTIFICATIONS & ACHIEVEMENTS

Certifications: Application Development Internship Credential | AI & Machine Learning Specialization

Core Strengths: Tool-enabled Agent Design, Agent State & Checkpointing, LLM Tracing & Reliability, Clean Code Architecture
